### Michigan State University

East Lansing, MI, USA

Research Assistant

Sept 2022 - Ongoing

- Implemented and tested a **fast algorithm for identifying all zero-crossings** in a time series signal using Persistent Homology.
- Devised a method using Cubical and Persistent Homology to mathematically **identify the state of a stochastic dynamical system** from its probability/kernel density (with reference to P-type bifurcations - monostable, bistable, limit cycle, et cetera).
- Established the best method of **persistence diagram replication for quantifying the onset of bifurcation** given single system realizations.

### Engro Fertilizers Limited

Daharki, Pakistan

Graduate Engineer (Maintenance)

Oct 2021 - June 2022

- **Developed and enriched maintenance manual procedures** pertaining to NARF handling, Shaft Installation of API 611 Steam Turbines, and overhauling/repair of Emergency Shut-off Valve (ESV) for GE-NP's API 612 Steam Turbines (SAC 1-8 and 1-4).
- Aided the implementation of a **hot box-up** weighing nearly 1 ton at a major leakage of Process Air (SS321H, 550°C, 40 kg/cm<sup>2</sup>, 50ft height), preventing a forced outage of Enven plant for 5-6 P2P days.

### Computations for Advanced Materials and Manufacturing Lab

University of Wyoming, WY, USA

February 2020 – December 2020

- Developed and verified user defined material subroutines (**uhyper and vumat**) of **Murnaghan model of hyperelasticity** for ABAQUS in free form Fortran language.
- Wrote a **structured mesh model for ABAQUS using MATLAB**, and utilized bash and python scripting for results' extraction, to detect corrosion using third order elastic constants' effect on second harmonic generated by a Lamb wave as a Non-Destructive Testing technique.
- Generated **preliminary results for a grant proposal on thermally initiated Frontal Polymerization** by establishing relationship of sample initial temperature, thermal conductivity, heat rate and trigger temperature with time required for initiating a front.

### Fluid Mechanics Lab

NUST, Islamabad, Pakistan

Research Assistant

April 2019 – August 2019

- Managed the **development of a test bench for pipe network analysis** for use in semester project evaluation of FM-II for my own batch.
- Drafted and filed a patent application for the bench.
- Reviewed **literature for a research project on subsurface drip emitters**, and devised an experimental setup for the project.
